KITCHENS

SECTOR PORTFOLIO:

Food Technology Rooms

Perimeter/Peninsular Designs

This portfolio focuses on the use of Steelplan Kitchens within Food Technology rooms in schools.

Our range of painted metal kitchens cabinets are the perfect blend of durability and aesthetics which is needed in these rooms: it is vital that students learn essential cooking skills within an environment that is similar to one in a domestic home, yet of equal importance is that the cabinets are able to cope with the rigorous demands of regular daily use. They also have a visual wow factor that makes the rooms pleasant and engaging areas in which to work and learn with a choice of 18 attractive door colours that can be complimented with a wide range of worktops such as stainless steel, laminate, solid surface or compact laminate.

The rooms in this portfolio focus on designs using perimeter/peninsular designs, however we also offer rooms with island cooking stations - please see our "Foodiepods for Food Technology" brochure for more information.

The following pages contain just a handful of the food technology rooms that we have supplied throughout the country, and we hope that we can work with you in the very near future to add your facility to our growing portfolio of work.

“We wish to pass on our thanks for providing a really good strong and durable kitchen that will withstand the usage for years to come with our students.”

HEAD OF SCHOOL, INVICTA GRAMMAR SCHOOL
