HIGH QUALITY ISLAND COOKING STATIONS FOR SCHOOLS AND COLLEGES

inspiring the next generation of foodie's

foodiepods

BY STEELPLAN KITCHENS

The quest to inspire the next generation to love food and to teach them how to cook fresh, healthy and great tasting meals begins in our schools and colleges. Whether it is to nurture the craft of healthy home cooking or to fan the flames of a future Michelin star Chef, the environment in which they learn has a vital part to play. That is why we have designed foodiepods. A range of high quality, strong & durable, island cooking stations. We offer them in a choice of four styles, all of which are available in either pre-set layouts with one or two cook zones (see Set Menu's p6) or you can design your very own pod through our À la Carte module offering. All foodiepods come bursting with colour through a choice of 18 flavours.

zest glaze sizzle spice

foodiepods

All the images in this brochure have been produced by our 3D software. Choose your pod and we will place it into this classroom so that you can see how it looks. All part of our free of charge foodiepod design service.

37

Paprika

41

Lime

TECHNICAL SPECIFICATION

- Cabinets, doors & drawers manufactured in zinc coated steel, coated in polyester powder stoved at 120°C., frames from 304 grade stainless steel.
- All pods come with a removeable back for easy access to any electric feeds/connections. Supplied as standard in brushed stainless steel, but also available as a painted back panel in any of the above flavours (use code: PBP).
- All flavours are based on RAL colour references for matching paintwork elsewhere in the classroom. Flavours shown are representative only.
