Overview: A range of bespoke made to measure stainless steel worktops and accessories. The ultimate work surface for longevity. With a very long life cycle they are a perfect complement to our durable metal kitchen cabinets. Available with a range of welded in bowl options. All cabinets are manufactured entirely in zinc coated steel.

Surface Finish: 304 grade stainless steel, 240S attractive silicone sheen finish. All worktops mounted on MDF substrate for ultimate rigidity and sound deadening.

Sizes: All worktops are made to measure to your drawings and templates.

Bowls: All bowls are fully welded with a hygienic seamless join - no dirt or grime seams and housed within a sunken water retaining drop section to minimise water spillage on to the floor. Important: the sunken area is designed as a health & safety feature – it is not designed to drain water into the bowl!

Upstands: Supplied with your choice of either 0mm, 50mm, 75mm or 100mm upstands to the rear.

Tolerance: Supplied worktops subject to +/- 3mm manufacturing tolerance.

All products manufactured under a quality assurance system in accordance with BS5750 Part 2/ISO 9002.
